

This table is designed for students to complete. The student should make a copy of this table and fill in the information. This version of the table will not have enough room to fill in the necessary information, it was done in HTML just to provide a version for you to copy.

Organic Chemistry Table

Macromolecule	Monomer(s)	Function(s)	Example(s)
Disaccharide			
Polysaccharides			
Triglycerides			
Steroids			
Phospholipids			
Proteins			
Enzymes			
Nucleic Acids			

Prepared by [P. Vanderschaegen](#) Date: January 1, 1997
